

# Integrated Multi Pilot License (MPL) Training

HOURS		DEVICES	
 Theory	 Solo flight	 Single engine	 Full Flight Simulator
 Dual flight	 Simulator	 Simulator	

**Theoretical course:**  
Theory necessary for the MPL and ATPL License. Contains 14 subjects divided over 740 hrs. Performed by classroom instruction, excursions, computer based training and practical

**Phase 1:**  
Basic flying skills under visual and instrument flight rules on both simulator and aircraft, including Upset Prevention and Recovery Training (UPRT) and night training. All Training single pilot on general aviation piston engine aeroplanes.

**Phase 2:**  
Advanced flying skills under visual and instrument flight rules, including crosscountry flights. All training multi pilot. This phase is completed by the multi crew cooperation course on a turbo-propeller simulator.

**Phase 3:**  
Advanced flying skills under instrument flight rules, including line orientated flight training in a A320 procedure trainer and simulator.

**Phase 4:**  
All training necessary to obtain a type rating on the A320 aeroplane. This phase is completed by the MPL skill test and base training on the aeroplane.
